TECHNICAL SKILLS

- HTML
- CSS
- Javascript
- React
- Jest
- Webpack
- GitHub
- Git
- Vitest
- Cypress

PROJECTS

FakeStore Shopping Cart | React, Vite & CSS

- Implemented multiple-level prop-drilling to pass data between components.
- Employed React Routing for seamless navigation, eliminating page refreshes.
- Integrated FakeStore API for product data to create an authentic experience.

CV Creator | React & CSS

- Built a user-focused UI with interactive class components.
- Implemented state management to update and render the CV in real time.
- Integrated export functionality to generate downloadable resume pdf.

Task Management App | HTML, CSS & Javascript

- Intuitive interface for users to seamlessly manage projects and priorities.
- Interactive features that allow users to add, edit, & delete projects.
- Updates using JavaScript to reflect real-time changes without page reloads.
- Utilized Webpack to bundle & optimize application assets for quick loading. times.

Weather App | HTML, CSS & Javascript

- Utilized Weather API for live weather updates and Pixabay API for dynamic background images according to weather.

WORK EXPERIENCE

ThoughtFlow | Junior Developer

June 2023 - present

- Built company's website using Webflow and added custom code to personalize it.
- Made several customised CMS for reusable collection pages and components.
- Wrote end-to-end tests to simulate user experiences using Cypress.
